Northern Kane County Chapter

Midwest Groundcovers LLC has been supplying the green industry with high quality plants, including a broad selection of Midwest regional natives, for 44 years. In 2011, The Natural Garden Nursery joined Midwest, adding over 240 species of local ecotype natives to our selection. The name Natural Garden Natives® ensures the plants have been propagated from stock beds that were established with ethically collected material from within 90 miles of St. Charles, IL. Natural Garden Natives® are excellent for sustainable plantings and the restoration of private and public areas. Home gardeners in the central Midwest can now find local ecotype natives at independent garden centers under the branded name of Natural Garden Natives®. Midwest Groundcovers is also an industry leader in sustainable nursery practices.

Rock River Valley Chapter

Pizzo Native Plant Nursery LLC, a wholesale grower with a specialization in native plants, is known throughout the industry as not only being a reputable grower but also an established knowledge broker in the business of restoration ecology and native plants. Our nursery encompasses 40 acres of restored wetland and prairie habitat in DeKalb County, Illinois, providing us with ready-access to local ecotype seed from a diverse number of native plant species. Our production facility includes

greenhouse space allowing for extended growing and targeted, date-specific delivery. We have over 20 years of ecological restoration experience behind our products and understand the business of ecology. We pride ourselves on strong customer relationships delivering a superior quality product and customized service to many.

Possibility Place Nursery

Monee, IL 60449
(708) 534-3988
Kelsay@possibilityplace.com
www.possibilityplace.com
Greater DuPage Chapter

For over 30 years we here at Possibility Place Nursery have been growing native species found in Northern Illinois and the Great Lake States. We specialize in over 140 species of woody plants, a majority of which are sourced from within 50 or so miles of the farm. We take pride in the quality of the material that we produce and work hard to help our customers make informed decisions that will result in successful plantings. Add in the roughly 200 species of herbaceous plants, that we grow to order, and you get a full service nursery with great plants and an expert staff to help you. We take public appointments on Fridays and Saturdays, so please call ahead.

- All our plants are grown in Rootmaker pots and containers.

Red Buffalo Nursery

jack@redbuffalonursery.com
www.redbuffalonursery.com
Rock River Valley Chapter

Red Buffalo Nursery specializes in plants native to the prairies, wetlands, savannas, and forests of northeastern Illinois and southeastern Wisconsin. We grow plants from locally collected seed whenever possible. Plant sales occur at our nursery in spring and fall, at farmer's markets, and by appointment. Visit our website for a plant list, sales dates, and locations. When you are here, be sure to visit our prairie and sedge meadow restoration. We are proud of our natural area and have protected it with a permanent conserva-

tion easement. Our services include design, landscaping, and natural areas restoration and management. When we design a garden or create a management plan, we use the original pre-settlement environment as our model.

Wildflower Preservation and Propagation Committee (W.P.P.C.)

PO Box 352, Woodstock, IL 60098
cstuck2@comcast.net
www.theWPPC.org
Lake-To-Prairie Chapter

The Wildflower Preservation and Propagation Committee (The WPPC) was formed in 1983, in McHenry County, Illinois, as a non-profit organization dedicated to advocating the use of native species in the landscape. The WPPC's mission (much like Wild Ones) is to promote the use of native species through preservation, propagation and education. We accomplish our mission goals by offering the following programs and activities: *Annual Natural Landscaping Seminar (always the last Sat. in Feb) *Annual Native Plant Sale (always the first Sunday in May) *Grants to schools for Outdoor Classrooms *Natural Garden in Your Yard (homeowner mentoring program) *Sales of books and educational materials. *"Walks on the Wildside"

wildtype@msu.edu
www.wildtypeplants.com
Red Cedar Chapter

Wildtype exclusively grows plants native to Michigan, from Michigan genotypes.

We grow trees, shrubs, grasses and wildflowers typical of southern Michigan woodlands, wetlands and prairies. It is our objective to propagate nursery stock with enough genetic diversity to create self-sustaining populations. Therefore, the vast majority of our plants are grown from wild seed stock. This is what we mean when we say our plants are borne to be wild.

WILDTYPE also provides ecological design & consulting services for public, commercial and residential projects focusing on restoration and preservation of native landscape. Services offered include: species inventory & site assessment; design & planning; and the establishment & management of native landscape. Please contact us for more information.

Twin Cities Chapter

Natural Shore Technologies, Inc. is a design-build ecological restoration company with over a decade of experience in creating and maintaining quality natural areas. We work closely with clients to determine their specific goals, conduct thorough site analyses, and create practical custom designs that balance human use with nature. Our experience spans from small residential properties to sprawling city and county parklands. What sets us apart from other companies is our focus on shoreline buffers. Our company has the most experience restoring and managing lake, pond, and wetland shores across Minnesota. Our project management staff are directly involved in the design process. Many of our clients have us conduct long-term maintenance and monitoring. We grow our own Minnesota native plants and sell both retail and wholesale and carry emergent, wetland, and prairie species. We also supply a variety of erosion control materials.

The corporate national headquarters for American Family Insurance is located on 410 acres in the northeast edge of Madison. The company has transformed former agricultural land into diverse habitat including grasslands, a native prairie butterfly garden, oak savannas and ponds. Employees have the opportunity to participate in volunteer activities such as bluebird nest box monitoring or learn about ecological practices through guest speakers, tours and habitat enhancement projects. The company has developed a corporate commitment to responsible resource management as a long term investment in the community and its natural resources. American Family is the proud recipient of the 2005 John Nolen Award for Excellence in Ecological Restoration presented by the Friends of the University of Wisconsin Arboretum.

Bluestem Farm

S5920 Lehman Rd, Baraboo, WI 53913
(608) 356-0179
bluestem_farm@juno.com
www.bluestemfarm.com
Madison Chapter

At Bluestem Farm we draw on our more than 30 years of involvement with restoration work to grow high quality, diverse, local ecotype plants and seeds for landscaping and restoration work. Most of our genetics come from Sauk, Dane, Columbia, and Iowa counties in southern Wisconsin. We are also happy to do custom propagation. We try to maintain a small ecological footprint and encourage others to do likewise by choosing plants for their conditions rather than attempting to alter conditions to suit the chosen plants. We sell our plants at the Dane County Farmers' Market, and limited hours on the farm. We do not ship plants.

 Madison Chapter

At Good Oak Ecological Services our mission is to improve the environment for the benefit of people and the natural community. We are experts in native plants and the ecology of natural areas and we use this knowledge to create beautiful native landscapes and restore natural areas to a more pristine condition. Our primary background is in natural areas restoration, a discipline in which we work to rehabilitate damaged ecosystems so that these wonderful places and the wildlife that live in them can thrive and be enjoyed far into the future. But these remaining natural areas alone are too small and too fragmented to provide enough habitat for our wild plants and animals. By working with us to integrate native plants into our human landscape we can enliven your home, business, and community while giving our wild plants, butterflies, birds and other wildlife a place to live.

 Central Wisconsin Chapter

Shade-loving woodland wildflowers are our specialty. We have over 25 years experience growing them under artificial shade. Starting with ginseng in the early '70s, we branched out into goldenseal, and ultimately into woodland wildflowers native to the forests of the upper Midwest. Our flowers are grown almost entirely from our own stock or from seeds gathered in the woods around our farm. We have been able to amass a nice collection of plants without dislodging the parent sources from their native habitat. We think you will find these nursery-grown plants to be vigorous and well-suited as potted plants for nursery sales, for private landscaping or for commercial restoration projects. We ship bare-root, for overnight or next day delivery primarily in spring or fall, but at other times by request.

Joe Powelka, a practicing architect with 35+ years of professional experience and past national President of Wild Ones, has returned to his artistic roots through an investigation into color and form. Thirty-five years ago, while in college, he studied painting with an emphasis on color. Career and family halted that study of color. He is now combining this interest in color with a passion for flowers, native plants and nature in a new medium - photography. With the introduction of digital cameras, personal computers and photographic software, things not available when he started his exploration of color, Joe continues his studies through the manipulation of photographs of flowers, insects and anything else that catches his eye through the camera lens. He is currently working on producing fabric patterns from his work. ONE Plus Art was formed to market his work.

GreenTOWN Waukegan is a nonprofit organization that promotes urban gardening and local food production in the City of Waukegan. The goal is to re-invent the city as a 21st century Green Town, the name given to Waukegan in novels by Ray Bradbury, who played as a boy in the beautiful and mysterious tree-lined ravines of the Waukegan River system. GreenTOWN partners with schools, churches, local governments, and other nonprofits to create urban gardens and opportunities for people of all ages to re-connect with nature and learn about agriculture, nutrition and sustainability. Its motto is "nurturing plants, people, community."

The Conway

School offers an accredited, ten-month

the **Graduate Program in Sustainable Landscape Planning + Design**
Conway School

Master of Arts degree in sustainable landscape planning and design. We accept up to 19 graduate students a year from diverse backgrounds. The interdisciplinary curriculum is applied to real projects for real clients at three distinct scales: residential, community and regional. Projects include urban streetscapes, farmland preservation, habitat restoration, brownfields reclamation, historic landscapes, biological corridors, food security plans. Classes in humanities, site engineering, hand and digital graphics, oral presentations, and design theory parallel the projects. Whole systems approach, in a collaborative atmosphere. The pace is accelerated, the learning curve steep, the work professional. Real projects, real results.

Mid-Mitten Chapter

Chippewa Nature Center (CNC) is a private, non-profit organization whose mission is to inspire people and institutions to protect the natural world. The Center includes 1,200-acres of woodlands, wetlands, rivers and upland fields. There are more than 15 miles of hiking trails open daily, including the Chippewa Trail, a 3.5-mile recreational trail to downtown Midland. A wide variety of programs are offered year-round for children, families and adults, along with school programs, Nature Preschool and Summer Nature Day Camp. CNC is also home to a complex of three restored log buildings. The Center offers free admission daily, except during major events. A native plant sale held each spring offers native genotype plants, advice and help with planning natural areas. Wildflower and fungi hikes throughout the year and The Garrett Arboretum of Michigan Trees and Shrubs encourage participants to use native plants.

Kalamazoo
Nature
Center

The Kalamazoo Nature Center is a not-for-profit organization whose mission is to inspire people to care for the environment by providing experiences that lead them to understand their connection to the natural world. Our Community Wildlife Program works with businesses, golf courses, schools and private landowners to enhance wildlife habitat through native landscaping. We can assist with site evaluation, plant selection, design and installation. Our Great Lakes Ecological Program offers services such as site evaluation, management plan development and implementation. Specializing in invasive species control and prescribed fire the Great Lakes Ecological Management team has worked with government, non-profits, and private landowners to implement large and small-scale restoration activities.

Flint River Chapter

Mott Community College's Green Initiatives Team was formed to advocate for recycling and sustainability issues on campus. The college has recycling available for paper and beverage containers, it hosts environmental speakers and groups on campus, and promotes the use of native plants in the first garden of its kind on school grounds. As part of its strategic initiatives to engage the community at large, Mott College helps to promote education and stewardship among its employees and students through service learning and outreach efforts and by hosting environmental groups on campus. These efforts are helping to improve the quality of life in a multicultural community.

tkelly@belwin.org
St. Croix Oak Savanna Chapter

The Belwin Conservancy is a nonprofit organization based in Afton, Minnesota. Our 1,364 acre preserve is home to numerous rare and threatened plants and animals. Belwin hosts oak forests and savanna, restored and remnant prairie, wetlands, rich-fen, spring-fed streams, and more. Belwin works to protect and restore these native ecosystems. We have been practicing ecological restoration for decades, and regularly undertake landscape-level projects such as a 100-acre oak savanna restoration – widely regarded as one of the largest in Minnesota. Over 10,000 students every year visit Belwin to be immersed in nature. During the summer months, the Belwin Conservancy plays host to a herd of bison who roam and restore diversity to one of our largest restored prairies.

Greater Cincinnati Chapter

The Civic Garden Center is a non-profit horticultural resource dedicated to "building community through gardening, education and environmental stewardship". It is an oasis in the city - eight beautifully landscaped acres open daily to visitors at no charge and located 2.5 miles from downtown Cincinnati. Volunteers donate their time to maintain the grounds, and they and others provide finan-

cial support to the organization founded in 1942. Our cornerstone program - Community Gardens--touch 23 communities with over 47 active gardens. Compost Kids and Summer Sprouts programs introduce young people to gardening. The newly dedicated Green Learning Station teaches homeowners, students and business owners how to keep rain where it falls, how to garden anywhere and everywhere and how to recycle and compost. Visit Monday through Saturday from 9:00am - 4:00pm.

Beautifully situated on 1,000 acres along the shores of Wisconsin's deepest lake, Green Lake Conference Center is a premier Christian conference and leadership training center. We also host retreats and conferences for other groups including universities, school environmental education classes and non-profit companies. We are a favorite destination for family reunions and vacations. We encourage our visitors to take advantage of the ample opportunities our grounds provide for a wide variety of outdoor activities during their stay. We are very proud of our 57 acre native prairie, the Dawson Prairie, which has

steadily gained in popularity as its development progresses. Through day visits and consecutive sessions, the Prairie serves as a living classroom in environmental education.

rocksandz@aol.com
Twin Cities Chapter

Why native plants? I grew up within a prairie ecosystem, and have a deep appreciation for the unending and evolving beauty of the native flowers and grasses of that landscape. I am also a professional landscape designer who was trained in the field of landscape architecture, and have made an ethical commitment to the land as a steward and partner of the planet. Native plants are key to the ecology of place, and as such, are the best plant sources to use in designed natural environments.

Susan Tantsits and Louise Schaefer founded Edge of the Woods Native Plant Nursery in 2003. They work with homeowners and landowners, helping them to learn about native plants and assisting them in matching the right plant to right place for their properties. The nursery hosts educational programs throughout the year and Sue and Louise give community presentations on native plants and assist many community groups in their efforts to create habitat gardens in the Lehigh valley of Pennsylvania.

Wild Ones Vision and Values Statement

Wild Ones Vision for Our Future: To become a widely recognized voice for native plants and the sustainable landscaping movement, promoting increased use of native plantings that create living landscapes through grassroots efforts by example, education, marketing, and personalized support.

- We will raise public awareness regarding the benefits that native plants, including trees, shrubs, wildflowers and grasses, offer in a variety of settings so landscaping with native plants becomes the norm rather than the exception.
- We will persuade the general public that including native plants in home and public landscapes is aesthetically pleasing and healthier for our environment, and that reducing unnecessary turf grass reduces stormwater runoff and unnecessary use of water, fuel, and lawn chemicals.
- We will see the use of native plants extend into an increasing number of areas where plants touch the soil - such as pollinator support and public places.
- We will join forces with others to preserve native plants and biodiversity from loss due to development and other forces, including displacement by non-native invasive plants.
